

To Whom It May Concern,

I am pleased to write this letter of recommendation for **Kapil Sharma**, whom I had the opportunity to mentor as part of the **LFX Mentorship** (Linux Foundation Experience) as an **Open Source Mentee** from **September 2024 to December 2024**.

During this time, I had the opportunity to observe his professional development and dedication firsthand. Kapil consistently demonstrated strong analytical skills and reliability. He approached each task with enthusiasm and consistently met deadlines with quality results.

One of his greatest strengths is his solid grasp and understanding of the technology stacks (**Golang, Kubernetes, Containers**) used in the project. He also approached new technologies with curiosity and a clear intent to learn. The task at hand was a bit abstract, but he was able to collaborate with different stakeholders and drive things as expected. In our time, he worked on event generation in Inspektor Gadget, which laid the foundation for completing the troubleshooting experience for Linux and Kubernetes users.

Kapil is not only technically competent but also someone who understands the **end-user perspective** and can manage his **work independently**. I am confident that he will bring the same level of commitment and excellence to any future endeavor.

I strongly recommend Kapil Sharma for Software Engineering positions. Please feel free to contact me via email if you need any further information.

Sincerely,

Qasim Sarfaz

Software Engineer
